Analisis data menggunakan *Spearman's rho* dan diperoleh hasil bahwa tidak terdapat hubungan positif dan signifikan dengan koefisien korelasi 0,086 dengan signifikansi 0,094. Sehingga dapat disimpulkan bahwa tidak ada hubungan antara *peer attachment* dengan perencanaan karir pada siswa di pesantren modern sekota lhokseumawe.

Kata Kunci: Peer Attachment, Perencanaan Karir, Siswa Pesantren Modern

ABSTRACT

This study aims to determine whether there is a relationship between peer attachment and career planning in students at modern Islamic boarding schools in Lhokseumawe city. The research method used is quantitative method with correlational research type. Data were obtained through questionnaires of peer attachment and career planning. Respondents in this study totalled three hundred and seventy-eight students at the modern boarding school in Lhokseumawe city who were obtained using accidental sampling technique. Data analysis using Spearman's rho and the results showed that there was no positive and significant relationship with a correlation coefficient of 0.086 with a significance of 0.094. So it can be concluded that there is no relationship between peer attachment and career planning in students at modern Islamic boarding schools in Lhokseumawe city.
