Title : *Millennial Generation Fintech Adoption Behavior in Aceh*

This study aims to determine the influence of perceived usefulness, perceived ease of use, trust on fintech adoption in Aceh. The population used in this study is the millennial generation community in Aceh who have access to fintech or adopt fintech with samples taken using accidental sampling techniques which is a sampling technique based on chance by distributing questionnaires through google form to 97 respondents. The analysis technique used in this study is multiple linear regression test. The results of the analysis showed that the three independent variables, namely, perceived usefulness, perceived ease of use, trust had a significant positive effect on fintech adoption both separately (partial) and simultaneously (simultaneously).
