Title *: The Effect of Good Corporate Governance, Leverage, and Profitability on Firm Value of Manufacturing Companies in the Food and Beverage Sub-Sector Listed on the Indonesia Stock Exchange (IDX)*

This study aims to examine the effect of Good Corporate Governance, leverage, and profitability on firm value in manufacturing companies in the food and beverage sub-sector listed on the Indonesia Stock Exchange (IDX) during the 2021–2024 period. This study employed a quantitative research method. The sample consisted of 39 companies, selected using the purposive sampling technique. The data used were secondary data obtained from the companies' annual reports and financial statements. Data analysis was conducted using panel data regression with the assistance of EViews 10 software. The results indicate that, partially, Good Corporate Governance (GCG) has a positive and significant effect on firm value, leverage (DER) has a positive and significant effect on firm value, and profitability (ROA) also has a positive and significant effect on firm value. These findings suggest that the implementation of good corporate governance, appropriate capital structure management, and the company's ability to generate profits contribute to enhancing firm value.
