Title : The Effect of Information Quality, Source Credibility, Reputation, and Social Media Engagement on the GadgetIn YouTube Channel on Smartphone Purchase Intention in Lhokseumawe City*

This study was conducted to determine and test the effect of information quality, source credibility, reputation, and social media engagement on the GadgetIn YouTube channel on smartphone purchase intentions in Lhokseumawe city. This study uses primary data obtained by distributing questionnaires to 100 respondents who were selected using the Cochran formula and who have met the criteria. The data analysis method used in this study is to use multiple linear regression methods with the help of SPSS. The results of the study found that information quality on the GadgetIn YouTube channel has no effect on smartphone purchase intention. Furthermore, source credibility on the GadgetIn YouTube channel has a positive and significant effect on smartphone purchase intentions. Then reputation has a negative and significant effect on smartphone purchase intentions. And social media engagement on the GadgetIn YouTube channel has a positive and significant effect on smartphone purchase intentions. The results of this study are expected to help make a significant contribution in expanding consumer understanding in the context around smartphones, and can help content creators to develop effective strategies in content creation.
