Program Studi : Program Studi Akuntansi
Judul : Pengaruh *Current Ratio*, *Debt to Equity Ratio*, *Return on Investment* dan *Earning per Share* Terhadap Harga Saham Pada Perusahaan Teknologi Yang Terdaftar Di Bursa Efek Indonesia.

Investasi dalam saham merupakan pilihan investasi yang memberikan hasil tinggi dalam waktu yang relatif singkat karena harga saham selalu berfluktuasi. Penelitian ini mengkaji pengaruh antara *current ratio*, *debt to equity ratio*, *return on investment* dan *earning per share* terhadap harga saham pada perusahaan teknologi yang terdaftar di bursa efek Indonesia tahun 2020-2022. Teori yang digunakan dalam penelitian ini ialah *signaling theory* (teori sinyal). Populasi dalam penelitian ini berjumlah 42 perusahaan teknologi. Teknik pengambilan sampel menggunakan teknik *purposive sampling*. *Purposive sampling* adalah metode pemilihan sampel yang didasarkan kepada kriteria-kriteria tertentu. Sampel dalam penelitian ini berjumlah 24 perusahaan teknologi. Metode analisis data yang digunakan adalah analisis regresi linier berganda dengan menggunakan bantuan program SPSS *Statistic 25*. Hasil penelitian menunjukkan *current ratio*, *return on investment*, *earning per share* berpengaruh terhadap harga saham. Sedangkan *debt to equity ratio* tidak berpengaruh terhadap harga saham.

Kata kunci: *current ratio*, *debt to equity ratio*, *return on investment*, *earning per share*, harga saham.

Title : The Effect of Current Ratio, Debt to Equity Ratio, Return on Investment and Earning per Share on Stock Prices in Technology Companies Listed on the Indonesia Stock Exchange.

Investment in stocks is an investment option that provides high returns in a relatively short time because stock prices always fluctuate. This study examines the influence between current ratio, debt to equity ratio, return on investment and earning per share on stock prices in technology companies listed on the Indonesia Stock Exchange in 2020-2022. The theory used in this research is signaling theory. The population in this study amounted to 42 technology companies. The sampling technique used purposive sampling technique. Purposive sampling is a sample selection method based on certain criteria. The sample in this study amounted to 24 technology companies. The data analysis method used is multiple linear regression analysis using the help of the SPSS Statistic 25 program. The results showed that current ratio, return on investment, earning per share have an effect on stock prices. While debt to equity ratio has no effect on stock prices.

Keywords : *current ratio, debt to equity ratio, return on investment, earning per share, stock price.*
